

PRESTIGE LEAF
ENVIRONMENTAL AND CLIMATE
POLICY

Purpose

At Prestige Leaf, we recognize that environmental protection and climate resilience are essential to the long-term sustainability of our business and the agricultural systems on which we depend. As a company operating within global agricultural value chains, we are committed to managing environmental impacts responsibly, supporting sustainable agricultural practices and contributing to climate resilience across our operations and sourcing activities.

This Environmental and Climate Policy defines Prestige Leaf's commitments to managing environmental aspects, climate-related risks and resource use while promoting continuous improvement and responsible stewardship of natural resources.

Scope

This policy applies to:

- Prestige Leaf employees and management
- Joint venture operations
- Agricultural sourcing activities and related supply chain engagement
- Suppliers, contractors, and business partners where relevant

Environmental Commitment

Prestige Leaf is committed to preventing pollution, reducing environmental impacts and improving environmental performance across areas under our control and influence. We integrate environmental considerations into decision-making, operational planning and sourcing practices through a risk-based and due diligence approach.

Climate Change and Greenhouse Gas Management

We recognize climate change as both an environmental and business risk affecting agricultural productivity, supply continuity, and operational resilience.

We commit to:

- Measuring and managing greenhouse gas emissions in line with recognized methodologies
- Improving energy efficiency in operations under our control and in the value chain
- Supporting climate-resilient agricultural practices
- Identifying and managing climate-related risks and opportunities
- Promoting continuous improvement in climate performance

Energy and Resource Efficiency

We strive to improve resource efficiency by:

- Reducing energy consumption and improving energy performance
- Promoting efficient use of natural resources
- Encouraging innovation and operational improvements that reduce environmental impact
- Supporting responsible infrastructure maintenance to prevent losses and inefficiencies

Water Stewardship

Water is a critical resource for agriculture and processing activities. Prestige Leaf supports responsible water management by:

- Promoting efficient water use in operations and value chain
- Encouraging sustainable water practices within agricultural sourcing
- Monitoring and addressing water-related risks where relevant
- Supporting practices that protect local water resources

Soil Health and Sustainable Agriculture

Recognizing the importance of soil for long-term agricultural productivity, we promote practices that:

- Protect soil quality and prevent degradation
- Reduce erosion and maintain soil fertility
- Encourage sustainable land management
- Support long-term agricultural resilience

Responsible Use of Agrochemicals

We promote responsible and safe use of pesticides and agrochemicals by:

- Encouraging compliance with applicable regulations
- Supporting training and awareness on safe handling and application
- Promoting risk reduction and responsible management practices
- Supporting continuous improvement toward more sustainable agricultural inputs

Biodiversity and Nature Protection

We recognize the importance of protecting ecosystems and biodiversity. We support practices that:

- Reduce negative impacts on natural habitats
- Promote responsible land use
- Avoid or mitigate deforestation risks where relevant
- Contribute to nature-related risk awareness and management

Waste and Pollution Prevention

We aim to minimize waste generation and prevent pollution through:

- Responsible handling, storage, and disposal practices
- Waste reduction and recycling initiatives where feasible
- Monitoring environmental incidents and implementing corrective actions

Environmental Due Diligence and Risk Management

Environmental aspects, impacts, risks, and opportunities are identified and assessed through Prestige Leaf's integrated management approach. We apply due diligence principles to understand potential environmental impacts across our operations and value chain and to define appropriate mitigation and improvement actions.

Roles and Responsibilities

Management is responsible for ensuring implementation of this policy and providing adequate resources for environmental management. Employees are expected to act responsibly and contribute to environmental protection within their areas of responsibility.

Monitoring and Continuous Improvement

We establish environmental objectives, targets and performance indicators to monitor progress and drive continual improvement. Environmental performance is reviewed regularly through internal monitoring and management review processes.

Communication and Review

This policy is communicated internally and externally and reviewed periodically to ensure continued relevance, effectiveness, and alignment with evolving environmental and climate expectations.
